EDUCATION

COLEGIO DE SAN JUAN DE LETRAN - CALAMBA

July 2024

Bachelor of Science in Information Technology

Relevant Coursework: User Interface and User Experience design, Object-Oriented Programming, Computer Network and Troubleshooting, Database Management and Structures, Computer Hardware Technician

WORK EXPERIENCES

Equitable Computer Services Inc. | Makati City

October 2024 - Present

Software Engineer I

- Developed, modified, and optimized software applications using PHP, MySQL, AJAX, JavaScript, and other development tools to enhance functionalities, add useful features, and improve overall system performance.
- Enhanced and maintained core features of the Emedcore+ healthcare system, contributing to increased system stability, efficiency, and client satisfaction.
- Conducted end-to-end testing, quality assurance, and documentation for Emedcore+ under Maxicare, ensuring compliance with audit and industry standards.
- Designed and executed complex SQL queries to resolve database issues, support data migration, and generate patient/user reports, streamlining documentation workflows.
- Monitored, analyzed, and resolved error logs across development, staging, and production environments, ensuring faster bug resolution and minimizing downtime.
- Led demonstrations and presentations of system enhancements and bug fixes to stakeholders, integrating feedback and ensuring clear communication of progress.
- Participated in security testing and vulnerability assessments (VAPT) with DevOps to strengthen system integrity and compliance.
- Applied Git for source control and team collaboration, enabling efficient version tracking, code management, and deployment workflows.
- Supported continuous improvement by revisiting development processes, fixing bugs, and aligning programming methodologies with departmental frameworks and standards.
- Successfully deployed enhanced versions of Emedcore+ and contributed to the development of a Queue Board System for Maxicare, improving patient flow and service visibility.
- Provided ongoing technical support and troubleshooting for deployed systems, ensuring seamless user experience and timely issue resolution.
- Engaged in continuous learning of system processes, identifying opportunities for optimization and future improvements.
- Interacted with clients for software upgrades, training (onsite and remote), and post-deployment support, ensuring strong client relationships and system adoption.

Zkript Solution OPC | Paete, Laguna

February 2024 - May 2024

Software Developer (Internship)

- Designed user interfaces and optimized user experience using Figma, ensuring visually consistent and user-friendly layouts
- Translated UI/UX designs into responsive, functional web components using React.js and Tailwind CSS for government client projects
- Utilized Git commands (push, pull, clone, commit, merge) to manage code versions and collaborate efficiently with development teams
- Monitored and managed project tasks and documentation through Linear, supporting organized workflows and timely deliveries

World Coffee Alliance | London, United Kingdom

November 2022 – February 2023

Graphic designer (Freelance)

- Designed marketing materials such as advertisements, posters, and event cards using Photoshop, Canva, and Illustrator, aligning with brand identity and event themes
- Conceptualized and developed creative themes and visual ideas for events organized by the World Coffee Alliance
- Collaborated directly with clients and sponsors to understand design requirements and deliver customized visual assets for promotional use
- Produced engaging video presentations and animated GIFs for event marketing and digital platforms, enhancing audience engagement

FLOG Fitness (Lablog) | Hongkong

June 2022 – December 2022

Graphic Designer (Freelance)

- Promoted lifestyle subscriptions and membership programs for a fitness organization through targeted advertising campaigns
- Designed promotional posters and produced engaging videos to support marketing initiatives and brand visibility
- Collaborated with various partner organizations to align marketing materials with joint campaigns and expand outreach

Select Training and Management Consultancy LLC | Abu Dhabi

August 2020 – December 2020

Graphic Designer (Project-Based)

- Created animated advertisements for various products using Vyond, Photoshop, Illustrator, and Canva, enhancing brand appeal and audience engagement
- Analyzed product scripts and translated key messages into compelling visual content for promotional use
- Collaborated with the SELECT Training project team to align animations and visual materials with client objectives and branding guidelines

Yazaki – Torres Manufacturing Inc. | Calamba, Laguna

February 2019 – April 2019

Human Resources (Internship)

- Gained hands-on experience in managing and supervising student employees, including conducting interviews focused on their goals and personal development
- Led and coordinated a team of student employees, assigning tasks and ensuring timely completion of responsibilities
- Developed foundational leadership and employer skills through real-world interaction and team management
- Acquired basic proficiency in the Japanese language to support communication and cultural understanding in the workplace
- Assisted in organizing events and activities to foster engagement and motivation among student employees
- Gained exposure to the industrial environment by participating in the production of automotive wiring harnesses, enhancing understanding of manufacturing processes.

Municipal Government of Paete, Laguna | Paete, Laguna

April 2018 & May 2019

Special Program for the Employment of Students (SPES)

- Conducted census activities across various barangays in Paete, Laguna, gathering and verifying population data for local government records
- Participated in leadership training focused on team management and effective communication within a government setting
- Calculated and documented land ownership and tax information using a private server to support accurate landowner records
- Organized and managed barangay files, ensuring timely endorsement and signature by barangay officials for official documentation
- Gained hands-on experience as a Local Government Unit (LGU) assistant by supporting various departments and understanding LGU operations

UNIVERSITY PROJECTS

AN ASSISTIVE BI-DIRECTIONAL REAL TIME SIGN LANGUAGE MOBILE APPLICATION USING MEDIAPIPE, CONVOLUTIONAL NEURAL NETWORK, AND GENERATIVE ADVERSARIAL NETWORK (CAPSTONE PROJECT I)

Sept 2023 - Jan 2024

- Designed and implemented a mobile application capable of translating sign language gestures into text and vice versa, enabling real-time communication between hearing and non-hearing individuals
- Utilized MediaPipe for real-time hand tracking and gesture recognition, enhancing the accuracy and responsiveness of sign detection
- Trained CNN models to classify and interpret various sign language gestures based on preprocessed image datasets
- Integrated a GAN to generate realistic video feedback for translating text into sign language, improving user understanding and interaction
- Contributed to advancing accessible technology through innovative use of machine learning and real-time image processing
- Collaborated in a multidisciplinary team to manage UI development in Java, system testing in Android Studio, and data storage using MySQL

LETRAN CALAMBA PAYMENT SYSTEM PROJECT

April 2022

- Developed a Letran Calamba Payment System as a school project, streamlining student payment transactions and record-keeping
- Built backend functionality using PHP and MySQL to manage payment data, user authentication, and transaction history
- Designed the front-end interface with HTML, CSS, and Java for a user-friendly experience for both students and administrators
- Implemented secure data handling and validation features to ensure reliable payment processing
- Contributed to improving school administrative efficiency through automated payment tracking and reporting features

PET ADOPTION SYSTEM

January 2022

- Developed a Pet Adoption Website System (PAWS) endorsed by the Calamba City Government to support local animal adoption efforts
- Designed and implemented key features for listing adoptable pets, user registration, and adoption request processing
- Utilized web technologies (specify if applicable: PHP, MySQL, HTML, CSS, etc.) to build a responsive and user-friendly interface
- Aimed to streamline communication between potential adopters and animal shelters while promoting responsible pet ownership
- Collaborated with local government representatives to align system features with community needs and ensure accessibility

CERTIFICATES

Certiport IT Specialist: Databases
